*Richmond-based food manufacturing software Icicle ERP outshines global competitors in the AgTech market.*

Richmond, BC, August 22, 2023--(T-Net)--**Food manufacturing ERP software company, Icicle Technologies Inc.** announced today that it has claimed the top honour for post harvest systems as the 2023 AgTech Breakthrough winner for Overall Post Harvest Company of the Year.

Icicle Technologies' says it contributes to food manufacturing through the **automation of best practices that optimize resource utilization**, maximize ROI, and ensure compliance with evolving regulatory requirements.

The AgTech Breakthrough Awards **recognize the achievements of AgTech companies and solutions** in categories including farm management, indoor farming, IoT and robotics, FoodTech, analytics and more from around the world.

The 4th annual awards program attracted over 1,750 nominations globally, with each company evaluated for innovation, performance, ease of use, functionality and impact.

Icicle has developed an **all-in-one ERP system designed specifically for food and beverage manufacturers** and with complex, multi-stage manufacturing processes in mind.

Equipped with a suite of comprehensive features capable of managing every aspect of a food production business, Icicle **enables food manufacturers to automate processes, streamline tasks**, and simplify operations to achieve faster growth and surpass their goals. Our user-friendly system can effectively replace and unify your operations to provide the clear picture you need to make informed business decisions.

The Icicle Team's **customer-centric approach was also recognized** in G2's recent Relationship Index Summer 2023 reports, where Icicle earned top scores in performance and customer satisfaction rankings.

"We appreciate being recognized alongside other innovators looking to shape a better future for food production," **said Icicle Technologies CEO Steven Burton.** "The international recognition of the Overall Post Harvest Company of the Year Award affirms our commitment to global collaboration in pursuit of that goal."
